OBJECTIVE

Adaptable and motivated B.Tech student specializing in Artificial Intelligence & Machine Learning, with a strong foundation in programming, data structures, and data-driven problem solving. Currently building and exploring Machine Learning and Deep Learning projects, with a strong ability to learn new technologies quickly and apply them to practical problems. Seeking opportunities to contribute to real-world projects while continuously developing technical and professional skills.

SKILLS

Programming: Python, C++, C, Java, JavaScript, SQL

Frontend: HTML, CSS, React.js

Machine Learning: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Data Preprocessing, Feature Engineering, Model Evaluation

Deep Learning: Neural Networks, Model Training, Deep Learning Projects

Databases: MySQL, MongoDB, PostgreSQL, Vector Databases

Data & BI: MS Excel, Power BI

Core: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving

EDUCATION

Aditya University, Surampalem

2024 – Present

Bachelor of Technology in Artificial Intelligence & Machine Learning | CGPA: 8.9

Aditya Junior College, Amalapuram

2022 – 2024

Class XII | Percentage: 93.6

PROJECTS

01 — Artist Portfolio [GitHub]

A personal portfolio website developed to showcase sketching and artwork. The platform allows visitors to explore artworks and place sketch commission requests.

Tech: HTML, CSS, JavaScript

02 — Land Records Digitization & Validation [GitHub]

An AI-based system for digitizing land records from scanned documents and validating extracted information. It applies OCR, data processing, and machine learning techniques to improve extraction accuracy and reduce manual effort.

Tech: Python, OCR, Machine Learning, Data Processing

03 — Predictive Analytics & Machine Learning Platform for Land Acquisition Delay Governance [GitHub]

A predictive analytics platform designed to analyze land acquisition records and identify factors associated with potential delays. The system supports data preprocessing, feature analysis, machine learning-based prediction, risk identification, and data-driven governance insights.

Tech: Python, Pandas, NumPy, Scikit-learn, Machine Learning, Predictive Analytics, Data Visualization

ACHIEVEMENTS

- Solved 400+ problems on LeetCode.
- Completed HackerRank practice in Java, SQL, Problem Solving, C, and C++.
- Achieved 1350+ contest rating on CodeChef with 35+ contests.
- Typing speed: 60+ WPM.

CERTIFICATIONS

C Programming • C++ Programming • Python • Java • SQL • MS Excel • Power BI • Machine Learning • Red Hat Linux Administrator
